

Daniel Adel Helmy

Flutter Developer

Cairo, Egypt

+20 122 508 4331 danieladel217@gmail.com | GitHub | LinkedIn

Professional Summary

Flutter Developer with 2+ years of experience building scalable, high-performance mobile applications using Clean Architecture and modern state management (BLoC, Cubit, Provider). Proven ability to integrate complex features such as real-time systems, payment gateways, and API-driven architectures. Passionate about writing clean, maintainable code and delivering production-ready solutions.

Experience

- **ILC Soft**

Flutter Developer

Cairo, Egypt

Jan 2025 – Present

- Develop and maintain scalable Flutter applications used in production environments.
- Architect application layers using Clean Architecture and MVVM to improve scalability and maintainability.
- Implement advanced state management (BLoC, Cubit, Provider) to optimize performance and reduce unnecessary rebuilds.
- Integrate RESTful APIs with proper error handling, secure networking, and JSON serialization.
- Collaborate within Agile/Scrum teams, participate in sprint planning, and contribute to code reviews.

- **Cellula**

Flutter Developer Intern

Remote

Feb 2025 – Mar 2025

- Contributed to feature implementation and bug fixing in real-world Flutter applications.
 - Integrated Firebase services including Authentication and Firestore.
 - Improved code readability and structure under senior developer mentorship.
-

Projects

- **Absher App (Published on Google Play)**

GitHub

- Multi-role platform supporting Users, Interpreters, and Admins for professional dream interpretation.
- Subscription-based access (Silver / Gold) for submitting dreams and receiving interpretations.
- Real-time chat between users and interpreters with full privacy protection.
- Role-specific dashboards for interpreters and admins to manage requests efficiently.
- Deployed on Google Play Store.

- **Dive Connect App (In Progress – Google Play Planned)**

GitHub

- Multilingual platform connecting tourists with divers.
- Trip request workflow with admin approval system.
- Emergency support system for tourists to reach nearby divers.
- Real-time notifications, live chat, and maps integration.
- Diver course management and performance tracking.

- **Bus System App**

GitHub

- Smart school transport system with seat booking and gender-based allocation.
- Live location tracking of buses and stops selection via Google Maps.
- Multi-role support: Students, Drivers, Admins.
- Push notifications for booking confirmations and updates.

- **Get Fix App**

GitHub

- On-demand service platform connecting users with nearby technicians.
- Location-based matching using Google Maps and issue image uploads.
- Full request lifecycle: submission, acceptance/rejection, and completion tracking.
- Real-time chat and push notifications.
- Multi-role system: Users, Technicians, Admins.

- **Markety App**

GitHub

- Full-featured e-commerce platform with social engagement features.
- Merchants can showcase products, manage orders/payments, and create promotional content (Stories, Reels, Posts).
- Real-time notifications for offers, discounts, and product updates.
- Users can search, order, chat, and interact socially with content.

- **Feastly App**

GitHub

- AI-powered personalized meal recommendation platform using Gemini AI.
- Dynamic meal data fetching and detailed recipes with step-by-step instructions.
- Interactive AI suggestions based on user-provided ingredients.
- BLoC state management for efficient UI updates.

- **Care Link App**

GitHub

- Comprehensive healthcare app enabling secure management of patient data.
- Multi-role system: Patients (data appointments), Doctors (access recommendations), Admins (management verification).
- Secure QR-based sharing and Chatbot integration for intelligent queries.
- Push notifications for appointments and updates.
- Full privacy and encryption for all sensitive data.
- Complete user experience including profile, session, and settings management.

Technical Skills

- Flutter, Dart
- Clean Architecture, MVVM, SOLID Principles
- BLoC, Cubit, Provider
- Firebase, Supabase, REST APIs
- Real-Time Systems, Notifications, Chatbot Integration
- Git, Postman, Retrofit

Education

- Egyptian E-Learning University (2020 – 2024)
Bachelor's Degree in Computer Science

Languages

- Arabic: Native
- English: Professional Working Proficiency
